

7 February 1983

NOTE FOR: Deputy Director for Intelligence  
Chairman, TTAC

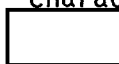

FROM: Executive Assistant to the DDCI

SUBJECT: Additional Questions on HYSHARE 700 Sale to the PRC

1. Dave Laux advised us today that we will be required to provide Judge Clark our views again by this Friday on the sale of the HYSHARE 700 Computer to the PRC. He will also be tapping the Secretaries of Defense, State, and Commerce for their views.

2. Laux also asked that we provide answers to the following questions as soon as we can:

- Where are the PRC missiles targetted?
- Can we be more precise in our analysis of the differences between the HYSHARE 700 and the CRAY Model that the Chinese have built? Specifically, how would you compare ~~it~~ in aerodynamics simulation, nuclear weapon design, and ~~them~~ electronic countermeasures simulation.
- In addition, how would you compare the CRAY 1 Computer and the Chinese model of a CRAY 1 in the performance characteristics
